

## NATFORT ENERGY

 Zimbabwe |  Solar Home Systems |  US\$600,000

### Making solar home systems affordable and accessible to rural and peri-urban poor in Zimbabwe

Natfort Energy undertakes solar Engineering, Procurement and Construction (EPC) for on-grid and off grid applications in the household and commercial sector. The company has extended their product offering to become a last mile solar home system distribution partner in the rural and peri urban areas of Zimbabwe. Through REACT SSA, Natfort Energy will lower the purchase price for low-income households thus allowing them immediate access to cleaner and renewable energy solutions.

### Expected Impact

-  39,000 new direct connections.
-  119,000 people reached.
-  Weighted benefit of **\$32** per household.
-  18 direct jobs created.
-  14,244 SMEs benefiting.
-  41,900 people reached.
