Expanding solar electrification for unserved communities

ACCESS SA is a micro-grid developer and currently operates microgrid sites of between 50kW and 100kW in Mali. Through REACT SSA, ACCESS SA is scaling up the distribution of quality solar home systems and productive solar systems to rural communities that are not served by its microgrid networks.

Expected Impact

19 362 households in **250** villages in Sikasso and Koulikoro reached.

2.09 MWp of clean power installed.

96,810 people reached.

15 direct jobs created.

2,175 MWh of power generated per year.

3,000t CO2e yearly avoided.

260 SMEs connected and **10** franchise agents (on commission).
