US\$1,100,000

Powering rural communities through mini grids

Sahelia Solar is an integrator of photovoltaic solar systems for residential, commercial, industrial, and rural applications. The company undertakes design, engineering, installation, commissioning, and maintenance of grid-connected and off-grid PV systems. Through REACT SSA, the company is piloting mini grids in new locations availing reliable power to rural agricultural cooperative members, households and microenterprises.

Expected Impact

810 rural households reached.

594 microenterprises connected.

27 rural activity centers established.

4,050 people reached.
